Temperature Log

BUSINESS NAME

WEEK OF

Cold holding: 41°F or below

Hot holding: 135°F or above

Freezer: 0°F or below

Reheating: 165°F within 2 hrs

[illegible]

Check and record temperatures at the start of each shift and at regular intervals throughout the day. If a reading falls outside the target range, take corrective action immediately (adjust equipment, move product, discard if unsafe) and note it in the corrective action column. Keep completed logs on file — your FirstCheck consultant may review this log during your next visit.
